

Basic Calculator Web App Project

By Nexthikes

Built with HTML, CSS, and JavaScript

Project Overview

- This is a simple calculator web application that:
 - - Performs basic arithmetic operations
 - - Uses a clean UI built with HTML & CSS
 - - Supports keyboard input
 - - Uses JavaScript for logic handling

Folder Structure

- Project Folder:
- - index.html
- - style.css
- - script.js

How It Works

- - UI elements are created with HTML
- - CSS styles make it visually appealing
- - JavaScript handles user input and calculations
- - Keyboard support allows convenient operation

How to Run the Project

- 1. Open VS Code
- 2. Create the three files (HTML, CSS, JS)
- 3. Copy-paste the code into each file
- 4. Open index.html in a browser
- 5. Use your mouse or keyboard to operate

Thank You!
